### **Database Relationship Rules**

**Duplicate** - The database relationships are set up to NOT accept a duplicate student in a school - that is, more than one student with the same State ID, SchoolCode, Initials, Birthdate, Gender, Race, StateFY. If there is a situation that fits this criterion, such as twins who attend the same school and have same initials

and are of the same gender, the rule may be overridden by checking the “Duplicate” Yes flag for the second student.

The system will not allow importing of students with all the same criteria listed above unless the duplicate Yes flag is set.

### **New This Year**

**NEW REQUIRED FIELD: State ID** This is a student identifier that is unique to a student in the State. State IDs have been assigned to all students in all schools in the state (this process should be complete by October 15, 2006). This new field is located at the end of This is the first phase in the implementation of the new Achievement in Montana (AIM) system. For additional information on AIM, see <http://opi.mt.gov/ITProjects/AIM.html>. Please contact Dave Nagel at 444-1641.

**The disability code CW (child with disabilities)** This code will continue to be included until all students who were reported with CW prior to December 2005 turn 6 years old, which will be December 2008.

**Setting of Service Codes, Ages 6-21** These codes have changed in the federal language that defines the codes, there are several codes that have been combined, and there are several new codes (see accompanying setting of service document).

**Setting of Service Codes, Ages 3-5** These codes have changed substantially. Please read the new codes and definitions carefully (see accompanying setting of service document).

**Preschool Outcomes Data (new this year) - NOT TO BE IMPORTED** Although this is a new data requirement and is being collected in the Child Count application, this data will not be imported. After a district has successfully imported child count data, and has reviewed the imported data for accuracy, the district must then enter preschool outcomes data for all students ages 3-5 and some 6 year olds reported in the application who meet the criteria (see accompanying memo).

### **Other Data Integrity Rules**

1. For students with a “CW” or “DD” disability code, the birth date must be 12/02/2000 or later (younger than 6 years old on the December 1, 2006, Child Count date).
2. Setting of Service Codes 01, 02, 03, 21, 22, 08, 09, and 10 are only valid for students whose birth dates are 12/01/2000 or earlier (6 years or older on the December 1, 2005, Child Count date).
3. Setting of Service Codes 23, 24, 25, 26, 16, 15, 13, and 27 are only valid for students whose birth dates are 12/02/2000 or later (younger than 6 years old on the December 1, 2006, Child Count date).
4. A Student cannot be entered into the system if the student’s birth date is 12/01/2003 or later (younger than 3 years old on the December 1, 2006, Child Count date) or 12/02/1984 or earlier (older than 22 year old on the December 1, 2006, Child Count date).
5. State ID must be a 9 digit number that can not begin with zero (0).
